DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 10, 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Chippas.

Chippas discloses the claimed invention, including an elongated hitch bar having a hitch coupling at each end. Each hitch coupling engages a hitch “catch”, one on dock (or boat) and the other on boat. A locking mechanism is provided on each end for closing the coupling after engagement with the catch.

Re “hitch coupler”, such fails to positively recite any specific structure and/or arrangement so as to define over the couplers of Chippas.

3. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Heydolph.

Heydolph discloses the claimed invention, including housings for receiving the boat and dock attached elements **42**, and an elongated hitch bar positioned thereinbetween.

Re claim 6, rotatable locking mechanisms **58** are provided.

4. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Billings.

Billings discloses the claimed invention, including housings **14, 15**, and hitch catches **32** having a rope groove beneath the cleat horns.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Heydolph.

Heydolph fails to disclose a lock handle, however such fails to define over a wrench that would be used to tighten the locks.

It would have been obvious to one of ordinary skill in the art at the time of the invention to employ a wrench as is known in the art to tighten the locks of Heydolph.
